OVERVIEW

The TRITON 1000/2^{MKII} is based on Triton's class-leading 1000/2 model and will take a pilot and passenger to depths of up to 1,000 feet (305 meters).

Designed to comfortably accommodate two people, this compact and agile submersible is an excellent choice for anybody wishing to pilot their own superyacht submersible and explore the wonders of the ocean together with a family member or friend.

Weighing in at just 3,000kg, and with a top speed of 4 knots, the TRITON 1000/2^{MKII} is a smaller, lighter and faster version of the TRITON 1000/2; the Triton that revolutionized the industry, setting entirely new standards for ease of operation and integration. The model has a decade's proven track record of reliability, safety and fun.
